

**TYPES OF PARTNERSHIPS  
(Context and Purpose)**

- Rationale for partnership (influencing 'measures of success')
- Funding source(s) (influencing research outcomes)
- Duration (short-term or sustained)
- Scale
- Nature and locations of partner organizations and levels of involvement
- Position of partners within their organizations (institutional or individual buy-in)
- Accountability (to whom?)
- Emphasis on reflection/learning and room for formative evaluation to improve partnership itself as well as outcome
